Coronavirus and COVID-19: How to protect yourself and get care

Your health and safety are always our top priority. To help you protect yourself and your loved ones, we've gathered the most important information and guidance on the coronavirus and COVID-19. Check back for the latest information as we continue to update this page.

To get information that's specific to your area, select your state or region below.

Choose your region  **2**

California - Northern
California - Southern
Colorado - Denver / Boulder / Northern / Mountain areas 3
Colorado - Southern
Georgia
Hawaii
Maryland / Virginia / Washington, D.C.
Oregon / SW Washington

4 - Scroll down to "Getting care" section

Getting care in Georgia

IMPORTANT UPDATE

If you have any respiratory (lung) symptoms you should use caution as though you have COVID-19 and isolate yourself until you are better. Social distancing and isolating yourself is supported by recent declarations by Governor Kemp and those made by the Georgia Department of Public Health.

In short, **please do not come to medical offices, including Advanced Urgent Care centers, or hospitals requesting testing.** If you are having respiratory (lung) symptoms, please call 1-800-611-1811 (TTY 711) to talk to an advice nurse 24/7. In the case of an emergency, please dial 911.

Temporary facility closings

The following facilities will be temporarily closed effective immediately:

- [Henry](#)
- [Cascade](#)
- [Snellville](#)
- [Alpharetta](#)
- [Forsyth](#)
