

CVS Health[®] expands COVID-19 testing to 1,200 sites

Processing up to 1.5 million tests per month

We are pleased to share that our parent company, CVS Health[®], has expanded access to COVID-19 testing to 1,200 CVS Pharmacy locations across the country. Each site offers drive-through testing, and results are available in approximately three days.

Testing will be available to individuals who meet criteria established by the Centers for Disease Control and Prevention ([CDC.gov](https://www.cdc.gov)), in addition to state residency and age guidelines.

To determine if you qualify for testing, simply go to [CVS.com](https://www.cvs.com) to pre-register. You must pre-register for testing before you go. A physician referral is not required. Please be aware that the schedule fills up quickly, so there may be delays in getting an appointment.

The sites will be able to process up to 1.5 million tests per month. By increasing access to testing, CVS Health[®] hopes to help slow the spread of the virus. Testing will be overseen by licensed MinuteClinic[®] health care providers. No testing will take place inside CVS Pharmacy[®] stores or MinuteClinic locations.

Aetna is the brand name used for products and services provided by one or more of the Aetna group of companies, including Aetna Life Insurance Company and its affiliates (Aetna).

Aetna, CVS Pharmacy[®] and MinuteClinic, LLC (which either operates or provides certain management support services to MinuteClinic-branded walk-in clinics) are part of the CVS Health[®] family of companies.

ID NOW[™] COVID-19 test is the property of Abbott.
